Re-thinking IT, Re-inventing Business

We are seeing dramatic shifts as our planet becomes smarter. These shifts are changing the way business and society work. Nothing is changing more than Information Technology - the way it is accessed, the way it is used, the roles it plays and the responsibilities it bears.

View Webcast Information

- To view information about a specific webcast, click on the box of the webcast. The right hand column will bring up information on the description and speaker of the webcast. You can scroll down to view all information available for that webcast.
Changing Time Zone Settings

• To make sure webcasts are appearing in the correct time zone. Set your time zone here. You can also set it in your profile.
How to View a Webcast

- When a webcast is available, you can click on the webcast name and then click on ‘View Now’ in the left hand column. Clicking on ‘View Now” will pop open another window where you can view the webcast.
Uh Oh! Webcast Not There!

- If you click on a webcast, and receive the following screen on the left, that means the presentation isn’t available yet. View the run-time to view it then.
